

Diamond gold detector
Underground metal detector
Model No:AT-6088D

Popular Model

AT-6088D

Underground Metal Detector

苏州奥腾电子科技有限公司

SUZHOU AOTENG ELECTRON TECHNOLOGY CO.,LTD

Product Description:

User has to wave arms with traditional metal detector for searching metal objects. Such detector can cover limited surface during operation. It can hardly work in severe conditions. Due to the different principle, the detection depth of traditional detector is very limited. To have a better detection result, our company introduced the advanced remote sensing detection technology. After repeated research and test, we developed this remote sensing metal detector system, i.e. treasure metal directional indicator. It is characterized by searching fast over super large area and depth. Its signal can penetrate in mountain and pass through rivers. It can detect gold(Au), silver(Ag), copper(Cu), lead(Pb), tin(Sn), and jewel. The

detector can transmit and receive signal in a large range. The detection radius length can be over 1000 meters. The signal can penetrate 90 meters in the mountain without attenuation. It can detect one piece of silver coin buried in depth of several meters. The operation of this remote sensing detector is simple. Mastering the use of this detector may take some practice. But it is important for getting a successful detection result.

- Our products pass ISO9001 ISO14001 and get CE certificate!

Technical Parameters:

- **Application:** mineral lode searching, field exploration, archaeological research, treasure finding
- Detection of underground metal (mineral) position, size, and depth
- **Pinpoint six kinds of metal mine: copper, silver, gold, lead, tin and Diamond**
- Search range: 800 meters (radius)
- **Measure depth: Max. 50 m (To get best and higher detecting accuracy, the detecting depth we suggest should be less than 10-20 meters)**
- Handheld receiving antenna
- Power supply: 9 V DC rechargeable battery
- operation humidity: 0-95% (no condensation)
- Storage temperature: -40 C to + 85°C
- Net weight: 4kg
- Gross weight: 6.5kg
- Packing size : 54*17*50cm (carton)
